

CCS Pediatric Therapy & Family Wellness

UPDATED COVID-19 PROCEDURES: July 2021

To ensure the health and safety of ALL our CCS families, the following policies and procedures will be in place until further notice. Please note, we have no intention at this time to stop the use of masks in the clinic. Not only is it still the best practice recommendation for health care settings by the CDC, but the majority of the people entering and being treated in this clinic are children that are not able to be vaccinated at this time. If you have any questions or concerns about this policy, please contact Carrie at 847-702-1542.

These are the items we continue to keep in place to help keep everyone safe:

1. 2-3 entrances will be used instead of the main one only to decrease cross contamination.
2. Therapy session schedule starts will be staggered when possible.
3. As usual, the clinic has been cleaned regularly.
4. All carpets are cleaned regularly.
5. All surfaces will be regularly wiped down, both between patients and common areas throughout the day.
6. Toys are limited in session, washed thoroughly, and placed under UV lights prior to being placed back into the closets for use.
7. UVC lights have been purchased and will be used to sanitize the therapy rooms after each session.
8. HEPA filter air purifiers are constantly running in every room.
9. Required hand washing between clients and for each person entering the clinic before session starts.
10. Curbside pick-up and drop off (when applicable).
11. Hand sanitizer application for each child as they leave the clinic.

Arrival/Departure Procedures of Therapy (what you and your child should expect upon arrival/departure):

1. The waiting room is currently **closed** to all families.
2. Therapy sessions will be curbside pick-up and drop off (when applicable).
3. All therapists will be assigned to a specific entrance (1 of 3) and will be using that for the day to decrease cross-contamination.
4. All shoes will be left at the door and children **MUST** wash hands upon entry.
5. All therapists and adults/parents/guardians are **REQUIRED** to be masked in clinic. If your child is tolerant and will wear a mask, then we ask that they do.
6. Every session will be 50 minutes in duration. This will allow for your therapist to clean the treatment area, bring your child back out to the car and prepare for the next scheduled child.
7. As your child departs the clinic, we will apply hand sanitizer to clean their hands before getting into your car.

We thank you for your adherence to these new procedures and are grateful for your cooperation and support as we navigate these challenging times. Know that we ALWAYS have each of our CCS families at the forefront of every decision we have made. Should you have any questions or concerns, please do not hesitate to contact Carrie at 847-702-1542 OR carrie@ccstherapy4kids.com.
